

# Gallium FACTORY System Overview

## Course Overview

<b>Summary</b>	This course provides an overview of a Gallium FACTORY system workflow. It is aimed at project managers or lead engineers wishing to gain an overall understanding of the system architecture and installation.
<b>Code</b>	PT7065 - OVR
<b>Duration</b>	1 Hour
<b>Group size</b>	Max 4 people
<b>Prerequisites</b>	An understanding of broadcast television concepts and practices and of computers systems and Microsoft Windows.
<b>Products</b>	Gallium FACTORY
<b>Aimed at</b>	Anyone involved with a Gallium FACTORY system, administrative staff, operators, engineers, project managers etc.

## Objectives

At the successful completion of the course, the delegate will:

- Be familiar with the components of a Gallium FACTORY system.
- Be familiar with the workflow of a Gallium FACTORY system.
- Be familiar with how the Gallium FACTORY system is integrated within the rest of the channel, station or studio.
- Be aware of additional training needs for staff.

## About this Course

The purpose of this course is to familiarize participants with the principles of a Gallium FACTORY system. The course can serve as an introduction for other more detailed courses, as an early session prior to system installation or to familiarize staff who will not have extended contact with the system.

This course does not replace the 1-day Gallium FACTORY Technical Training course.
